

# Worker Bee DNA sample Guide

**1** Place the sample tube tag in the bottom part of the pliers

**2** Place the cutting tag in the top part of the pliers

**3** Place the flight muscle on the opening of the sample tag (bottom)

**4** The pliers are now ready to be closed together

**5** Once the pliers are closed, the sample is released into the bottom of the tube

**6** Open the pliers and take out the top tag

**7** Push up the sample tube with your nail

**8** Take out the sample tube
